

### RATING

---

Exceeds High Speed with Ethernet Specifications, 1080p-2160p, 12-bit Deep Color, 3D, 120Hz Refresh Rates (Supports 4K up to 8 meters)

Up to 5.0M => 4K/60P (444/8bit =18.0G , 422/12bit =18.0G)

Up to 8.0M => 4K/30P (422/12bit =13.5G)

### FEATURES

---

Tokyo, Japan • Furutech Co., Ltd., manufacturer of analog and digital audio and video cable plus a wide range of accessories, debuts HDMI-N1-4 HDMI cable. It exceeds new High Speed with Ethernet specifications with 1080p-2160p, 12-bit Deep Color, 3D, 120Hz refresh rates. (Supports 4K up to 8 meters)

Everything Matters

There is a popular misconception that inexpensive HDMI cables perform as well as more costly designs and that digits are just digits. They said the same about SPDIF digital cables, but it's generally accepted now that they do, and in fact the length of the cable matter to best avoid internal reflections that cause timing errors. The design, materials and build quality of every cable counts, especially with HDMI having to cope with greater and greater bandwidth. Meticulous attention to build quality is a large part of the Pure Transmission engineering equation: Top quality silver-plated  $\mu$ -OFC conductors are surrounded by triple-layer shielding and terminated with Furutech's beautifully-finished nonmagnetic  $\alpha$  (Alpha) 24k gold-plated conductor in a 24k gold-plated nonmagnetic copper alloy body.

### SPECIFICATIONS

---

- Main conductors: Nonmagnetic  $\alpha$  (Alpha) silver-plated  $\mu$ -OFC for minimal transmission loss
- HDMI connector: Nonmagnetic 24k gold-plated  $\alpha$  (Alpha) conductor with 24k gold-plated nonmagnetic copper alloy body
- Jacket: RoHS-compliant flexible PVC
- Triple shielding assures superior noise isolation
- Available in 1.2m/2.5m/5m/8m/10m/12m/15m/20m lengths
