

# WIREWORLD®

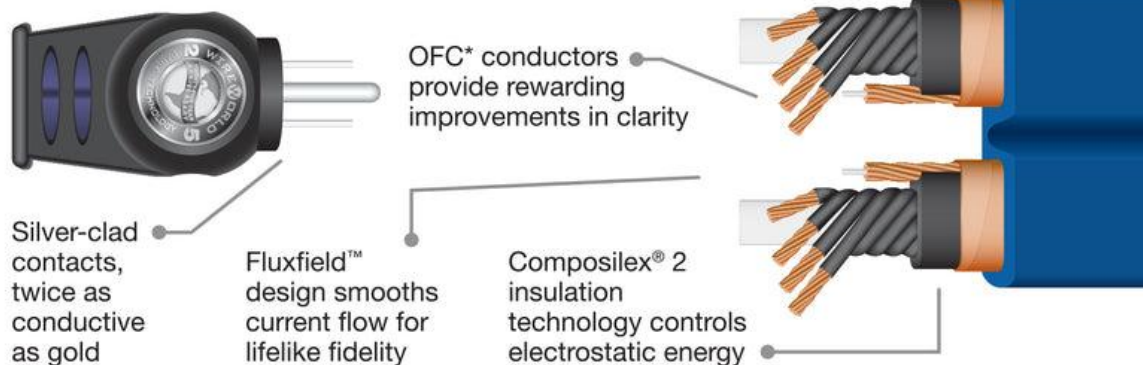

## CABLE TECHNOLOGY

**Stratus 7 Power Conditioning Cords:** A perfect choice for entry level music and AV systems, Stratus 7 OFC power cable makes surprising improvements in clarity and dynamic impact. This high-end 12 AWG power cord features Wireworld's proprietary Fluxfield design with COMPOSILEX 2 insulation that absorbs noise, and dual shields that eliminate electromagnetic interference. Flexible flat design bends and coils easily. Standard cable includes Globe-Grip plugs on AC and 15-Amp IEC ends. Unlike other types of audio cables, with power cords longer lengths equals better performance.

Purely dynamic, designed to absorb noise and block interference, Wireworld's innovative Fluxfield™ power cords designs feature ultra-quiet COMPOSILEX insulation for surprisingly vivid sound and imaging. Unlike all other audiophile power cords, Wireworld's power conditioning cables were developed through direct comparisons to battery power, the ultimate in sonic and visual purity. Their elegant plugs feature silver-clad contacts, for the quietest and lowest loss connections available.
